

# OTS

Operator Training System

Train your operations staff with an exact replica of the control room configuration

### Benefits

- Minimize operational incidents
- Improve plant shutdown/start-up
- Decrease the number of unplanned shutdowns
- Install it in a cloud server to reduce ownership costs

### Functionalities

- Have your control room operators trained on start-up procedures enough in advance
- Train operators on plant normal operation; on load changes; on emergency situations; on planned plant shutdowns and start-ups, from hot- and cold-conditions
- Coach staff on how to react in front of equipment and instrumentation malfunctions
- Involve field operators with 3D Immersive Training Simulators and virtual reality
